

With WINTERSTEIGER the future belongs to you.

With our Omega machine series, WINTERSTEIGER has again emphasized the fact that progress is a matter of forward thinking. The new line of manual base grinding machines is the result of a development process that is consistently oriented on the needs of the various target groups. Even better ergonomics, amazing flexibility combined with leading-edge technology and first-class after sales service assure the best possible conditions for success, and the ultimate skiing and snowboarding experience.

With our Omega model range, WINTERSTEIGER offers a large variety of machines for best in class tuning, tailored to the individual requirements of each shop. The range of machines starts with the simple Omega B belt grinding machine, continues with stone grinding and belt combinations, and pinnacles in the Omega Racing models which feature proven racing technology and parameter-controlled racing structures. To discover the potential for success that the world market leader offers you with our Omega series, check out the details on the following pages.

The flexible Omega family

Tailored quality for service professionals and racing specialists.

Our experience shows that providing machines that meet the individual requirements of a service shop is very important, especially for manual machines. For this reason, WINTERSTEIGER now offers more customization options with the Omega series.

Building on the extremely successful Sigma family, we have optimized our proven technologies while integrating innovations from our Race NC and the new WINTERSTEIGER automated machines. The Omega series is the result of in-house development and production that only the world market leader can offer.

Your benefits summed up:

- Easy to operate due to a new ergonomic design
- Optional equipment packages for individual needs
- All controls positioned within easy reach
- Rugged design and space-saving machine concept
- Touchscreen display with „Easy Go“ quick selection buttons
- Entry-level model without pneumatic system (no compressed air required)
- Large selection of consumables (belts, stones, and diamond bits)

Perfection for any ski or snowboard model:

- Rocker, V-shape, Carver
- All Mountain, Freeride, Touring Skis
- Cross-country, Telemark, Back Country
- Snowboards

Tuning made even easier

Making the best features even better!

Perfection ergonomics.

All controls and water valves are located within easy reach of the operator. Simply activate them by pressing on the touch screen.

„Easy Go“ quick selection buttons.

The factory default grinding programs can be customized at the control panel with an intuitive user interface and a large touchscreen display. Simply store your 3 preferred programs (A, B, C) on the „Easy Go“

quick access buttons (e.g., for pre-grinding, finish grinding and rental skis). You can see the parameters of the selected program on the touch-screen display. Colored LED light ring buttons keep you up-to-date with the current machine status.

The optional structure generator in the racing package suggests the best possible structure based on current snow and temperature conditions.

Control and comfort.

Thanks to an ergonomically shaped front cover and the folding handle on the feed, the operator can stand closer to the stone or belt while grinding. The new, hydraulic feed lift (option) allows for easy operation of the feed system.

Sharp edges.

The side edge grinding unit that is optionally available for the Omega B and SBI guarantees sharp edges and the desired side edge angle, which can be quickly and conveniently set (between 86° and 90°).

Clean machine.

An easily replaceable filter and the optional fine filter ensure perfect cleanliness without unnecessary effort.

Optimum application of pressure.

The three wheel feed system allows distribution of pressure to specific areas across skis, snowboards or cross country skis in a targeted way. This allows for optimum and precise structures across any base, especially when grinding convex or concave bases.

It's your Omega stone grinding machine

Customize machine performance, package by package!

Omega stone grinding machines offer you more than just a choice of various grinding stones and diamonds. They offer the freedom to improve each machine's performance as needs dictate, up to a full-fledged racing machine.

You can choose from a variety of individual packages which, all told, result in the Racing-Plus Package.

Racing-Plus Package		
Structure package	Feed package	Spray and filter package
Omega S / RS		
<ul style="list-style-type: none"> ■ An even more precise grinding pattern for the racing specialist ■ Fine, tunable structure depth (steps of 0.01 mm) and a two-sided diamond feed ■ Virtually unlimited structure versatility and parameter-controlled structure suggestions ■ Custom structures (e.g. wave and arrow) thanks to a centering unit 	<ul style="list-style-type: none"> ■ Servo-controlled pressure curves for consistent grinding pressure ■ Consistent results even when using grinding bridges ■ Choice of control pedals for ergonomic use ■ Optional feed wheels ■ Dry feed rollers thanks to the stone cover on the RS 150 and RS 350 	<ul style="list-style-type: none"> ■ Intelligent water spray with use of automatically controlled water valves ■ Optimum stone cleaning thanks to improved pump performance ■ Fine filter for improved water quality
Omega SBI / RSBI		
<ul style="list-style-type: none"> ■ An even more precise grinding pattern for the racing specialist ■ Fine, tunable structure depth (steps of 0.01 mm) and a two-sided diamond feed ■ Virtually unlimited structure versatility and parameter-controlled structure suggestions ■ Custom structures (e.g. wave and arrow) thanks to a centering unit 	<ul style="list-style-type: none"> ■ Consistent results even when using grinding bridges 	<ul style="list-style-type: none"> ■ Intelligent water spray with use of automatically controlled water valves ■ Optimum stone cleaning thanks to improved pump performance ■ Fine filter for improved water quality

The Racing-Plus Package includes all of the available packages. Ideal for racing specialists who demand uncompromising performance.

Structure package

The structure package gives you the option of creating and applying an unlimited variety of structures. The package includes a high-performance dressing unit, which is also used on the Race NC, the racing service flagship machine by WINTERSTEIGER. In addition to this, the optimized centering system ensures easier handling, even for center specific structures.

Structure preview

Optimized centering for even easier handling

Feed package

The feed package for the Omega S 150 and S 350 supports specific adjustment of pressure curves thanks

to pneumatic pressure control. There is also a choice of pedal options that add more flexibility to your workflow.

The proven racing feed guarantees best-in-class precision.

Pressure relief and pressure curve servo-controlled

Proven racing feed

Design your workplace even more ergonomically with a choice of various control pedals.

WINTERSTEIGER offers a wide range of feed rollers and has the perfect roller for every use.

Stone cover.

Keeps the workspace dry on the RS 150 and RS 350.

Spray and filter package

Racing specialists demand maximum spraying pressure and exceptionally filtered water. The spray and filtering package addresses these needs with an automatic valve which adapts the stone spraying system to match your workflow. Practical: the Omega SBI automatically switches over between belt and grinding stone.

High performance pump.

Guaranteed high spraying pressure for demanding racing specialists.

Omega SBI / RSBI – full performance with a minimal footprint

The inline (racing) grinding stone/belt grinding machine for skis, snowboards and cross country skis.

The compact Omega SBI combines the full range of services of a professional machine for both belt sanding and stone grinding. The compact footprint allows the machine to be placed right next to a wall for additional savings of valuable space. The Omega SBI is generously dimensioned in terms of performance and operator convenience. The touchscreen display on the operator station can be used to store custom grinding programs for the grinding stone and belt modules. Three preferred programs can be assigned to the three „Easy Go“ quick selection buttons.

Opting for the Omega RSBI means increasing your structure options by several degrees of magnitude, while at the same time improving precision through a centering mechanism as used for racing structures.

Omega SBI with side edge grinder

Omega RSBI

Your benefits summed up:

- Stone grinding and belt sanding in a single machine
- Rugged, space-saving design
- Touchscreen display with „Easy Go“ quick selection buttons
- Easy to operate
- Easy handling through supported feed lift options
- Operation without pneumatics (no compressed air required)

Additionally with the racing package:

- Customizable to suit your individual needs
- Even more structure options including center specific structures

Belt replacement in record time.

Replacing belts is a matter of just a few steps with no belt tracking adjustment thanks to a self-centering idler wheel. Easy cleaning of the machine was one of the first design features that was considered.

Rapid switching from grinding stone to belt.

You can quickly switch over from stone to belt processing and back with a single action.

Sharp edges.

This is what innovative grinding looks like today: the optimized SEG unit supports clean and consistent grinding results without a learning curve. The desired grinding angle between 86° and 90° can be set quickly and conveniently.

Fast pregrinding.

Simply switch over the machine to belt operation if pregrinding is needed. The belt module is also perfectly suited for processing snowboards.

Options for your success

- Individually selectable equipment packages start on page 7. Your WINTERSTEIGER sales representative will be pleased to provide more information on equipment details.
- Benefit from best-in-class WINTERSTEIGER quality grinding stones and diamonds.
- Choose from a variety of contact wheel hardness levels for optimum grinding results.
- Perfect edge beveling with the optional side edge grinding unit.

Unlimited memory slots for grinding programs.

Memory slots for grinding programs offer unlimited versatility in terms of structures. Structures can also be saved on a USB stick.

Omega S / RS 150 – your entry into the master class

The (race) stone grinding machine for skis and cross country skis.

The Omega S 150 is the ideal entry point into the world of stone grinding but if your sights are set on mastering race grinding we also offer the Omega RS 150. Inspired by our flagship racing service machine, the Race NC, the RS 150 brings race proven technology into your shop at a truly affordable price! The RS version offers many important features from our Race NC such as the stone shaft being connected directly to the motor for ultimate control and a wide range of optional feed rollers, designed to meet every need.

Omega S 150

Omega RS 150

Your benefits summed up:

- Professional stone grinding at an entry-level price
- Ergonomic, rugged and compact design
- Touchscreen display with „Easy Go“ quick selection buttons
- Easy to operate
- Easy handling through supported feed lift options
- Optimum support for cross country skis

Additionally with the racing package:

- Customizable to suit your individual needs
- Centering unit for custom racing structures

Centering unit supports custom racing structures

Convenient workflow.

Optional run-out supports ensure a convenient and ergonomic workflow.

Options for your success

- Individually selectable equipment packages start on page 7. Your WINTERSTEIGER sales representative will be pleased to provide more information on equipment details.
- Benefit from best-in-class WINTERSTEIGER quality grinding stones and diamonds and from a range specially designed for both cross-country and alpine skis.
- Optional run-out supports facilitate your daily work.

Omega S / RS 350 – 2 structures on one grinding stone

The (race) stone grinding machine for skis, snowboards and cross country skis.

Besides all of the benefits of the Omega model range, a special feature of these models is the grinding stone width of 350 mm. You won't just be able to grind snowboards; you'll also be able to work very efficiently, because the structures can be divided. You can create two structures at the same time by setting a different structure on either half of the stone.

The benefit is that it allows pre-grinding on one half of the stone and then follow up immediately with fine grinding on the other half. It is hard to imagine a more rational approach. Another positive aspect is the 100 memory slots to store any program needed in the machine. For racing specialists, the Omega RS 350 also offers a centering unit that supports easy and precise grinding of center specific racing structures (e.g., arrows structures).

Omega S 350

Omega RS 350

Your benefits summed up:

- „Easy Go“ quick selection buttons
- Ergonomic and rugged machine
- Two different structures on one grinding stone
- Professional stone grinding at an entry-level price
- Easy to operate

Additionally with the racing package:

- Customizable to suit your individual needs
- Centering unit for custom racing structures

Centering unit supports custom racing structures.

Optimum use of the grinding stone thanks to various centering positions.

Options for your success

- Individually selectable equipment packages start on page 7. Your WINTERSTEIGER sales representative will be pleased to provide more information on equipment details.
- A huge selection of consumables ensures perfect service from cross country skis, through rocker models to snowboards.
- Benefit from best-in-class WINTERSTEIGER quality grinding stones and diamonds.
- Optional run-out supports ensure a clean workplace.

Convenient workflow.

Optional run-out supports ensure a convenient and ergonomic workflow.

Omega B

Omega B with feed and side edge grinder

Omega B – rugged and versatile

The flexible belt grinding machine for skis and snowboards.

The Omega B's biggest benefit is its universal field of applications. This not only makes this top class belt grinding machine a solid stand-alone solution, but also the ideal supplement to any existing machines. Running the Omega B for pre-grinding, tuning, cold waxing, deburring, or polishing, the 350 mm belts can be replaced easily with just a few steps, guaranteeing first-class processing of skis and snowboards.

Full overview.

The easily understandable and intuitively arranged operator station gives you full control of all of the Omega B's features.

Two belt speeds and the infinitely controllable feed speed ensure individual belt sanding.

Belt replacement in record time.

Replacing belts is a matter of just a few steps with no belt tracking adjustment thanks to a self-centering idler wheel. Easy cleaning of the machine was one of the first design features that was considered.

Constant feed.

The optional autofeed features variable speed.

Optimum application of pressure.

The three wheel feed system allows distribution of pressure to specific areas across skis, snowboards or cross country skis in a targeted way ensuring an optimum and uniform base structure, even on convex or concave bases.

Sharp edges.

This is what innovative grinding looks like today: the optimized SEG unit supports clean and consistent grinding results without a learning curve. The desired grinding angle between 86° and 90° can be set quickly and conveniently.

Options for your success

- Optionally available with a full-fledged feed unit for perfect work
- Variety of contact wheel hardness levels for optimum grinding results
- Optional side edge grinding unit
- Optional hydraulic feed unit for even easier work

Your benefits summed up:

- Small footprint
- Fast and easy belt replacement
- Choice of contact wheel hardness levels with a self-centering tracking
- Optimum pressure thanks to PCS (Pressure Control System) feed, up to 450 N
- Ergonomic and rugged machine

WINTERSTEIGER – First class customer service and support.

WINTERSTEIGER sees its mission not only in the manufacture of innovative products for optimum customer benefit. Our demands and expectations go far beyond that. We understand the need for an accompanying partnership process that includes a range of optional services:

From planning to implementation.

WINTERSTEIGER provides complete system solutions for individual customer-specific requirements in all aspects of rental and servicing of skis and snowboards, including 3D planning, amortization and profitability analyses.

Strong customer service team.

A large team of extremely well-trained service technicians takes comprehensive care of the following:

- Machine set up
- Training courses
- Service stop-bys
- Preventive maintenance
- Advice
- Modifications
- Problem solving
- Repairs
- Support
- Fast spare parts supply

Individually tailored finance packages.

WINTERSTEIGER can offer you individually tailored finance packages, e.g. leasing or invoicing according to servicing demand.

Marketing partnership.

WINTERSTEIGER will support you in advertising your ski service. Together we will optimize your efficiency using professional advertising materials.

Success begins with the right decisions, at the right time.
We look forward to hearing from you!
